

## **Vancouver International Airport Deploys Quanergy 3D LiDAR Solution to Improve Passenger Journey**

*Leading LiDAR Solution Overcomes Legacy Challenges to Deliver Significant Cost Savings and Enhanced Operational Efficiency*

**San Jose, Calif. – November 20, 2023** – Quanergy Solutions, Inc., a leading provider of 3D LiDAR (Light Detection and Ranging) security solutions, was chosen by Vancouver International Airport (YVR) to analyze footfall to support the passenger journey with the ultimate goal of enhancing operational efficiencies. Quanergy’s technology is now delivering accurate data-driven insights for YVR’s Domestic Check-in and Security Screening facilities.

“Through the implementation of Quanergy’s solutions, we have harnessed the power of real-time insights, gaining a deep understanding of passenger volumes and the

associated wait times at different stages of their journey through the terminal,” said Jason Williams, Manager, Innovation & Technology Group, YVR. “With this high-precision data at our disposal, we can trigger real-time alerts whenever we approach or exceed predefined thresholds. This invaluable capability enables us to collaborate seamlessly with our stakeholders, ensuring that our travelers experience a smooth and stress-free journey through our airport.”

With Quanergy’s 3D LiDAR sensor and advanced perception software solution, Q-Track, YVR is able to accurately identify, classify, and track people/objects for enhanced operational insights. YVR currently uses these insights to meet a number of operational and business imperatives such as reducing check-in time and time spent passing through security, which ultimately sees an increase in customer happiness.

“We are pleased to have collaborated closely with the YVR team, resolving a multifaceted challenge encountered by many passenger terminals today,” said Adam Andres, Vice President, Global Sales, Quanergy. “The forward-thinking of the YVR Innovation and Technology Group, in embracing Quanergy’s field-tested and fully scalable Q-Track solution, led to the successful achievement of our project objectives. We take pride in our contribution, providing real-time actionable intelligence to enhance security, streamline operations, and elevate the overall passenger experience.”

### **About Quanergy**

Quanergy is redefining physical security with real-time 3-D LiDAR solutions. Based in Silicon Valley, Quanergy's revolutionary Security as a Service delivers intelligent proactive awareness for highly dynamic environments like critical infrastructure, smart cities, smart spaces, and industrial automation. Quanergy's mission is to ensure you see beyond current sensing limitations and experience the power of 3-D security designed for a 3-D world. For more information, please visit us at [www.quanergy.com](http://www.quanergy.com).

### **About YVR**

Vancouver International Airport (YVR) is a diverse global hub that connects people, cargo, data, and ideas and serves as a platform for our community to come together and thrive. We are motivated by supporting regional economic development and making a positive difference in the lives of British Columbians. We do this with a focus on serving our passengers, partners, workers, and community through digital modernization, climate leadership, reconciliation, and financial sustainability.
